Research Interests

My research focuses on the intersection of machine learning, temporal data, video learning, and representation learning. I develop advanced models to improve video understanding, particularly in compressed domains and through self-supervised techniques. Additionally, I explore novel methods for representing low-dimensional sequential data, such as protein sequences and univariate time series, using de Bruijn graphs to enhance model performance in classification and forecasting tasks.

Education

Indiana University, Luddy School of Informatics, Computing, and Engineering *Bloomington, Indiana*
PhD Computer Science *Fall 2023 – present*

- **Advisor:** Prof. Dr. Mehmet M Dalkilic
- **Co-Advisor:** Dr. Hasan Kurban

TOBB University of Economics and Technology *Ankara, Turkey*
BS Computer Science *2017 – 2021*

Publications

Peer Reviewed Journals

Research Experience

Texas A&M University at Qatar – *Temporary Research Associate* *Doha, Qatar*
Advisor: Dr. Hasan Kurban *May. 2024 – Jul. 2024*

- Developing a self-supervised learning framework for video data, enabling the model to learn meaningful representations without labeled data, improving video understanding tasks such as classification and segmentation.
- Implementing federated video learning in the compressed domain, optimizing the model's performance while preserving user privacy and reducing communication overhead in distributed learning environments.

Student Researcher – *Kurban Intelligence Labs*
Advisor: Dr. Hasan Kurban *Aug. 2023 – Ongoing*

- *Machine Learning Research*
  Conducting research on video learning, self-supervised learning, and representation learning with de Bruijn graphs.

Work Experience

Innova IT Solutions

Full-Stack Software Developer *Jul. 2021 – Apr. 2023*

- Contributed to the development of the ”Centralized Fault Management System (MARS),” designed to provide end-to-end fault detection, diagnosis, and resolution for telecommunication networks and IT infrastructures.
- Improved legacy codebase and developed new functionalities based on functional specifications and business requirements.
- Gained experience working in an agile development environment.
- Developed microservices using Spring Boot, interacting with PL/SQL and MongoDB databases in a microservice architecture.
- Worked on front-to-backend interactions using React.js and Vaadin frameworks, utilizing RESTful services for seamless integration.
- *Project Website:* https://www.innova.com.tr/en/centralized-fault-management-system-mars

CSCI-C 200 Introduction to Computers and Programming

Associate Instructor (TA) *Spring 2023 – Ongoing*

- Instructor: Prof. Dr. Mehmet M Dalkilic

Awards and Recognition

2023 **Fall 2023 Luddy Doctoral Associate Instructor Fellowship**, Luddy School of Informatics, Computing, and Engineering
